

Báo cáo thực hành LAB05

Lục Minh Đức - 20225810

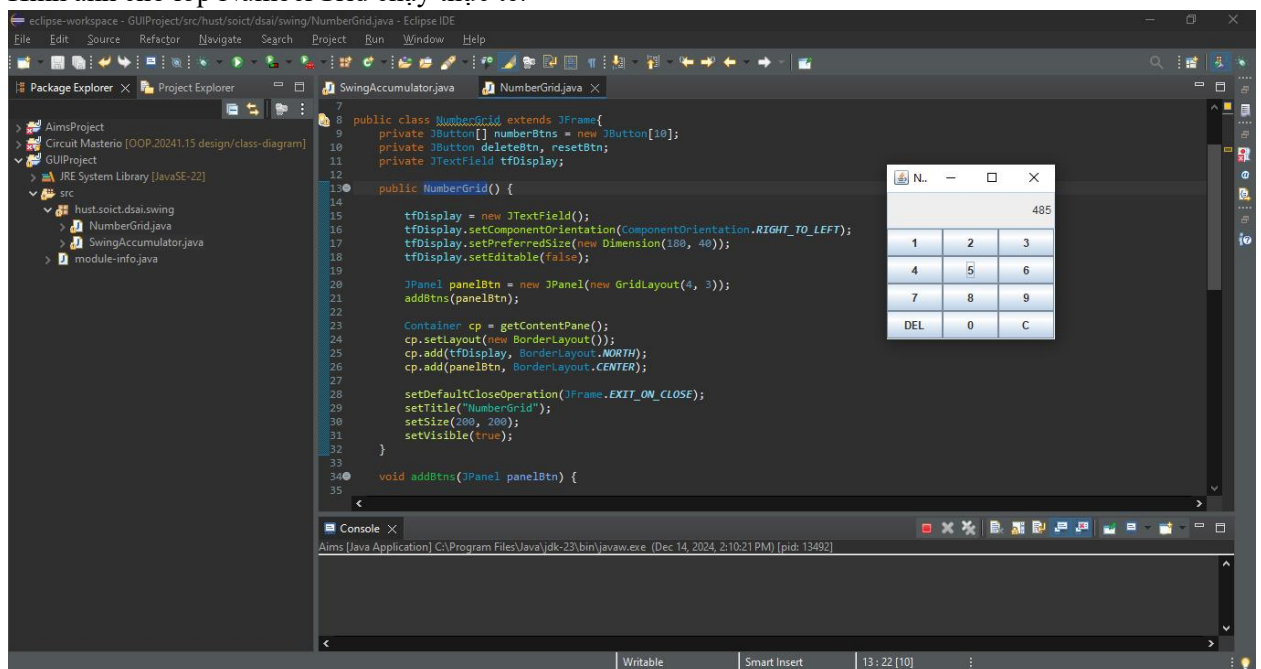

1. Swing components

- Hình ảnh cho lớp SwingAccumulator và chạy thực tế:

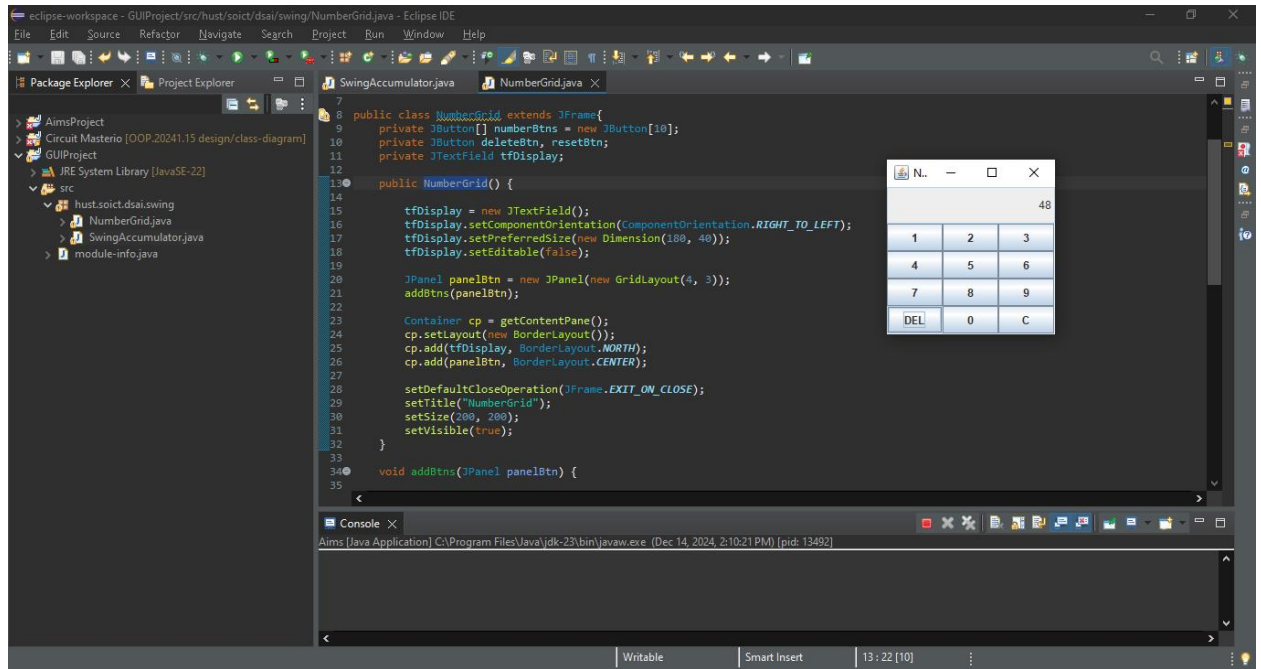

2. Organizing Swing components with Layout Managers

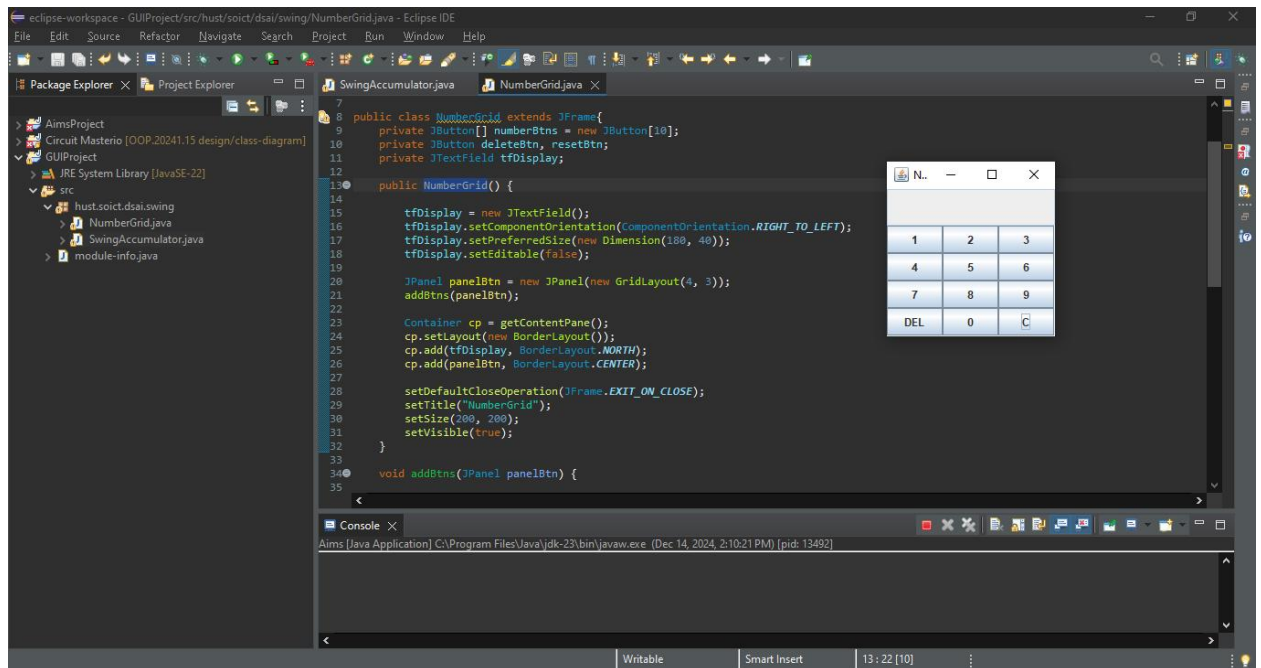

- Hình ảnh cho lớp NumberGrid chạy thực tế:

- Khi ấn DEL:

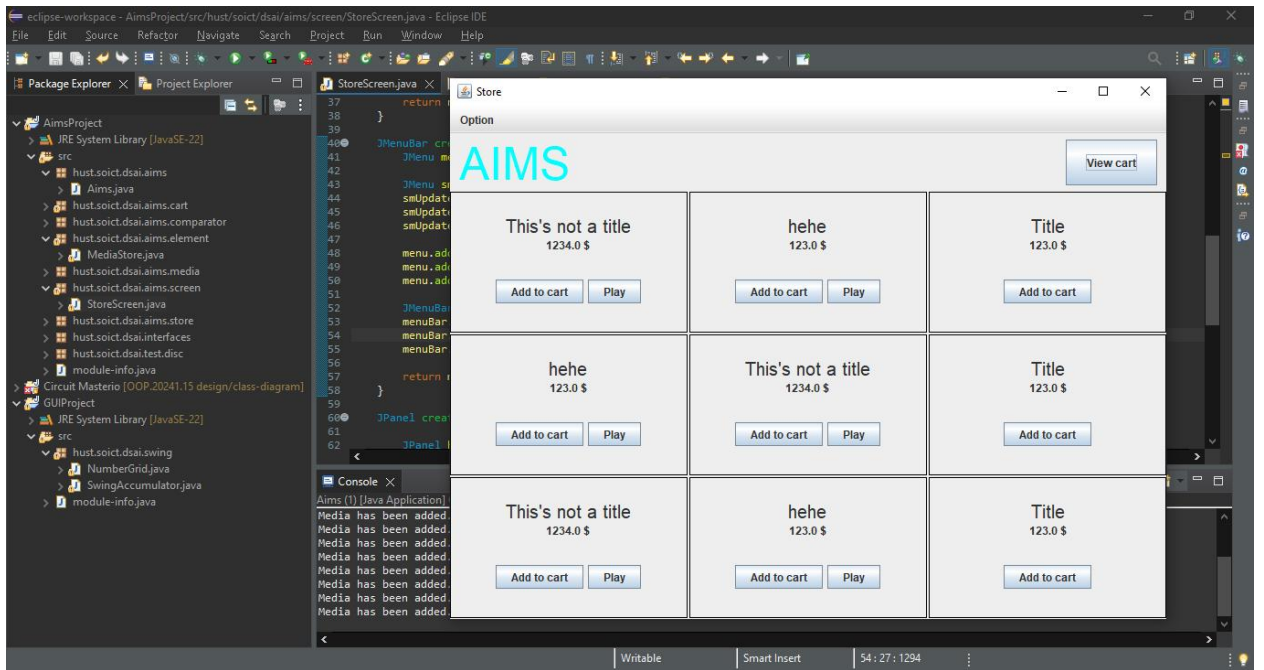

- Khi ấn C:

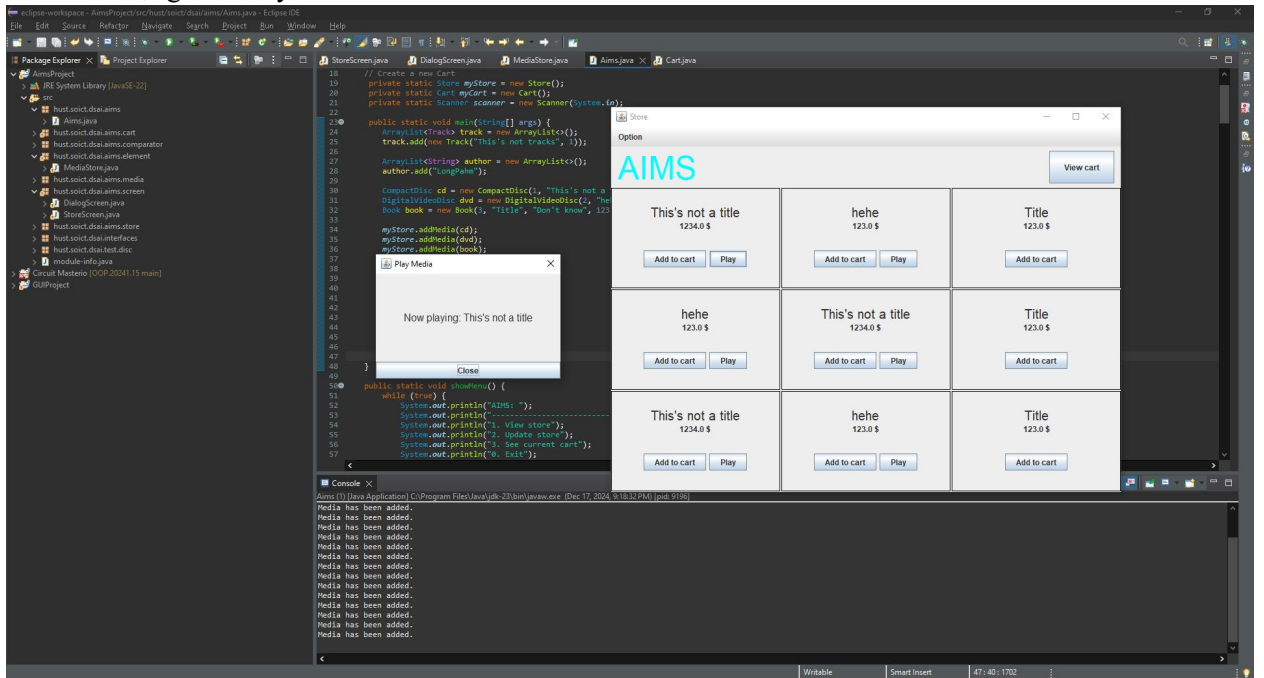

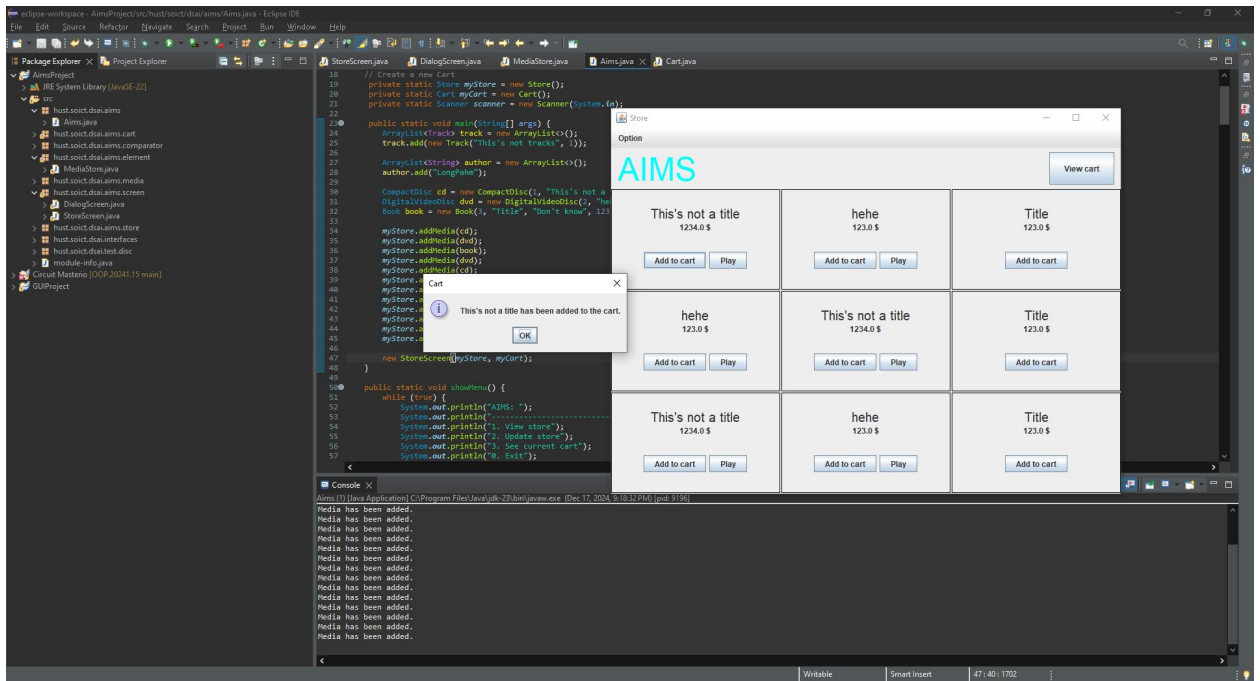

3. Create a graphical user interface for AIMS with Swing

- Hình ảnh cho class AIMS:

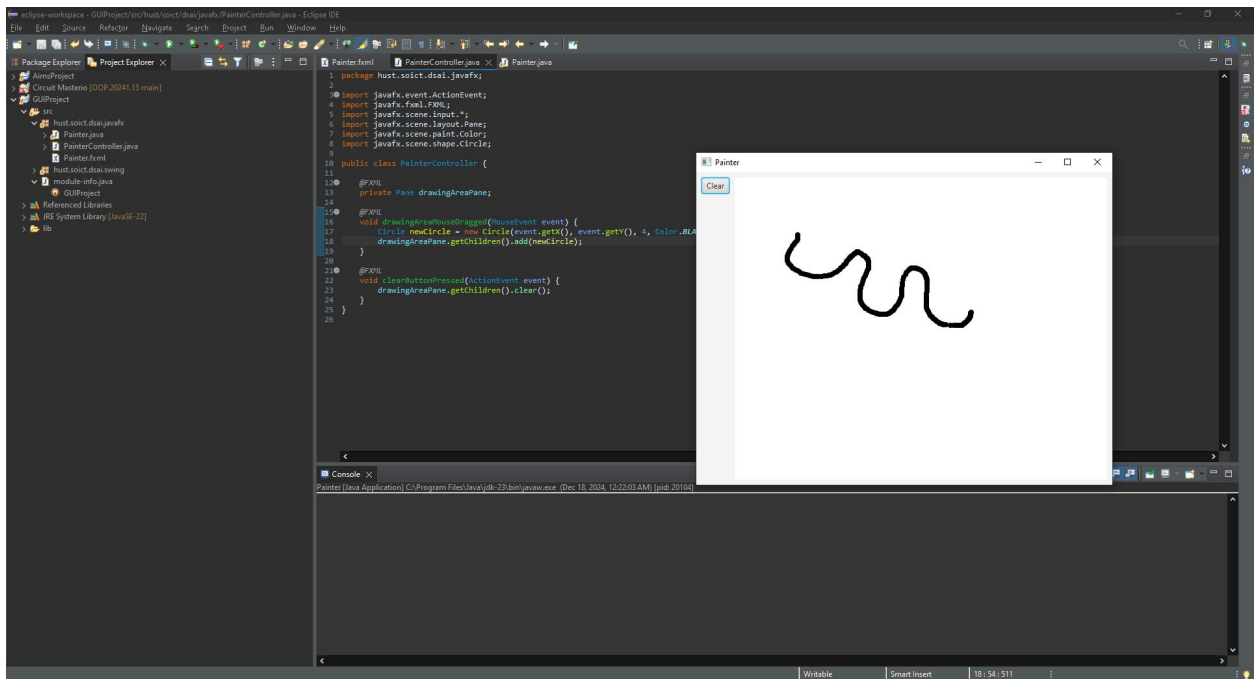

Các hành động cho Play và add to cart:

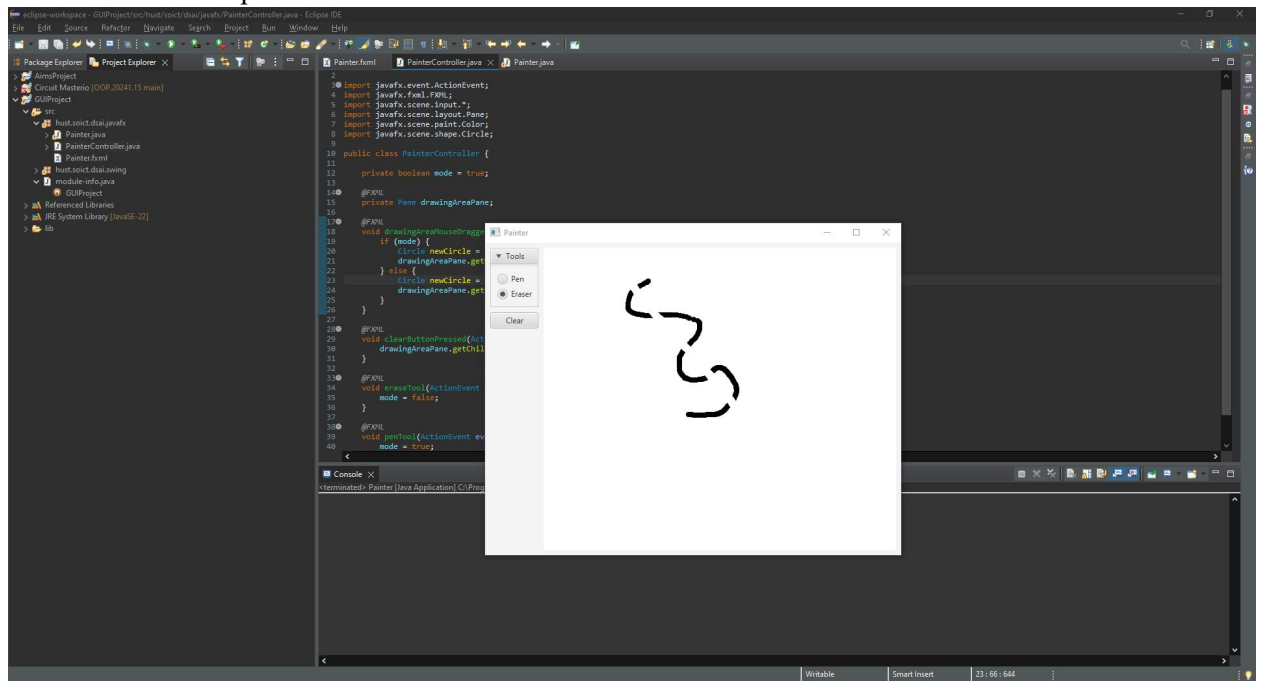

4. JavaFX API

- **Hình ảnh cho Painter:**

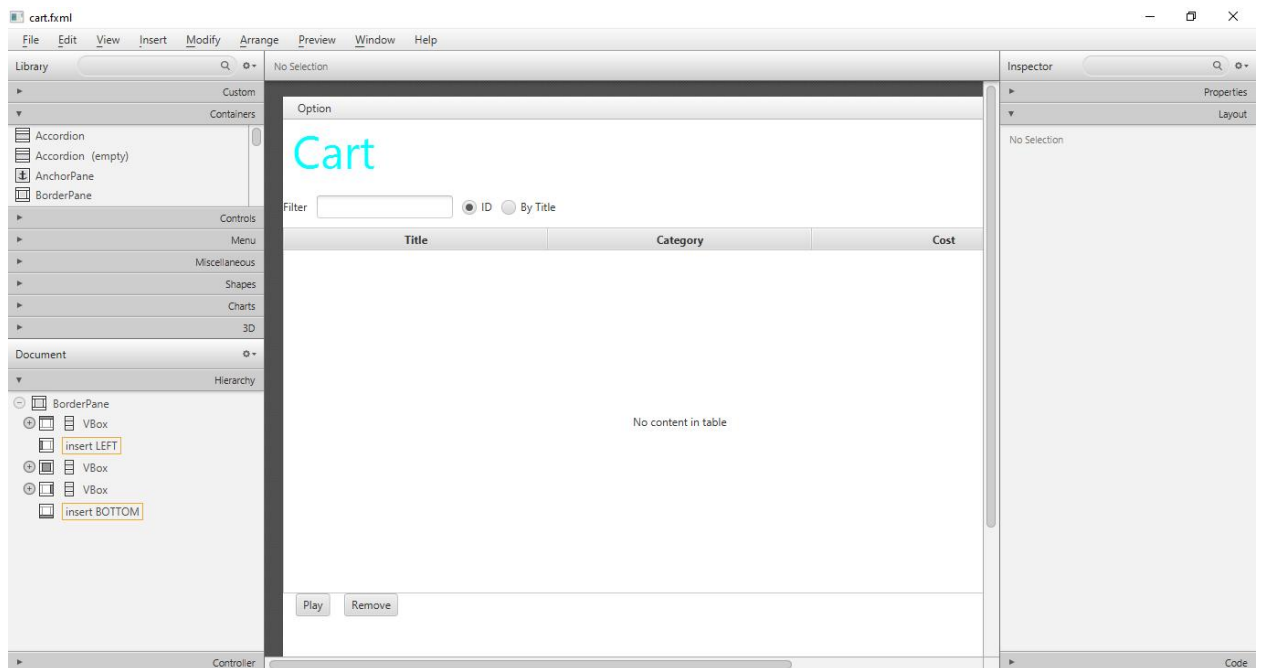

4.4. Practice exercise

- Thêm nút eraser và pen

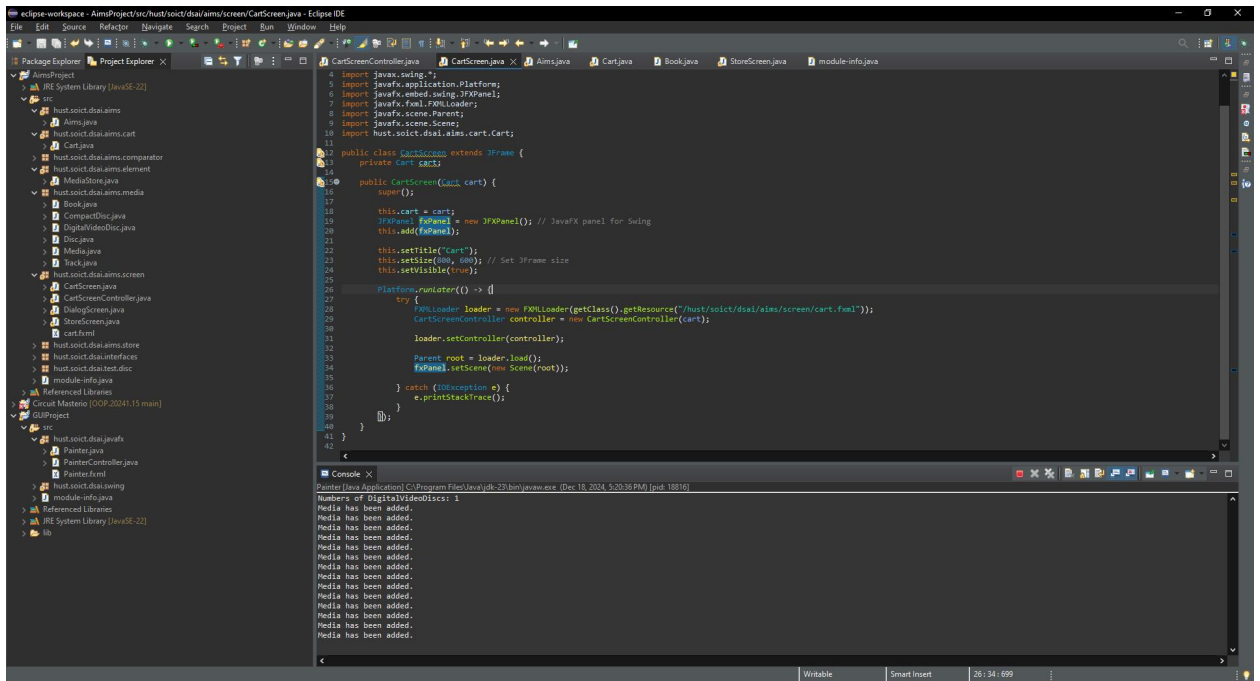

5. Setting up the View Cart Screen with ScreenBuilder

- Hình ảnh cho Cart Screen:

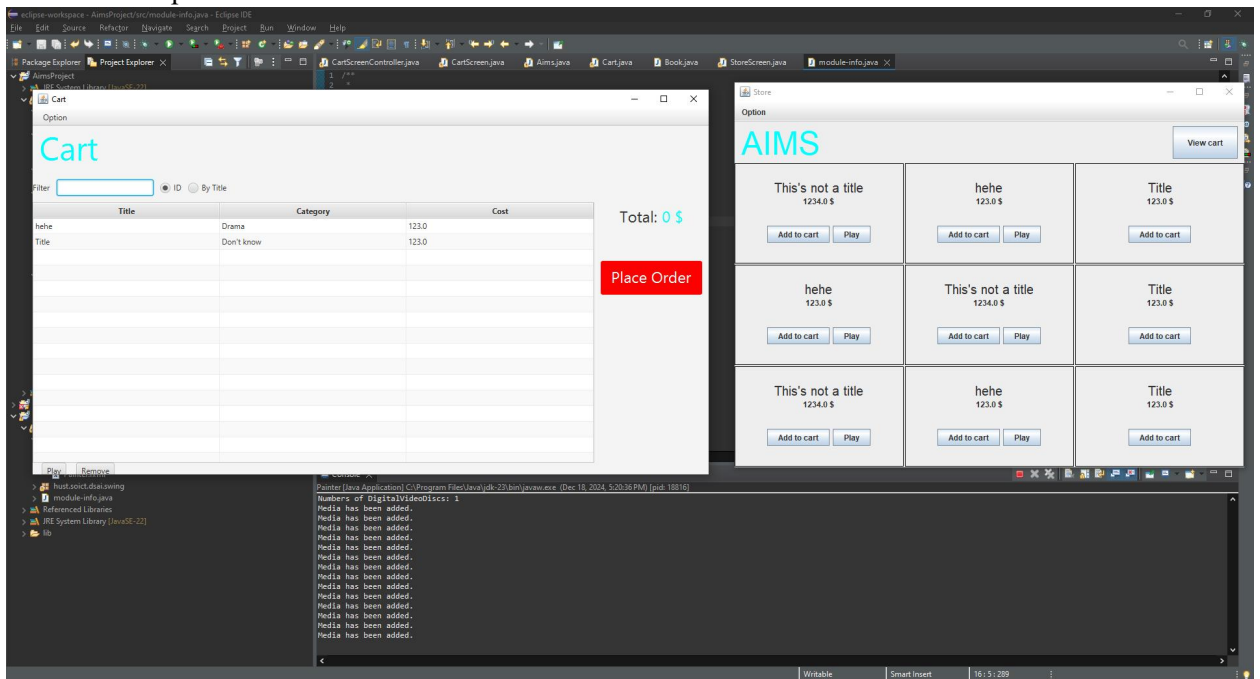

6. Integrating JavaFX into Swing application – The JFXPanel class

- Hình ảnh cho đoạn mã của CartScreen:

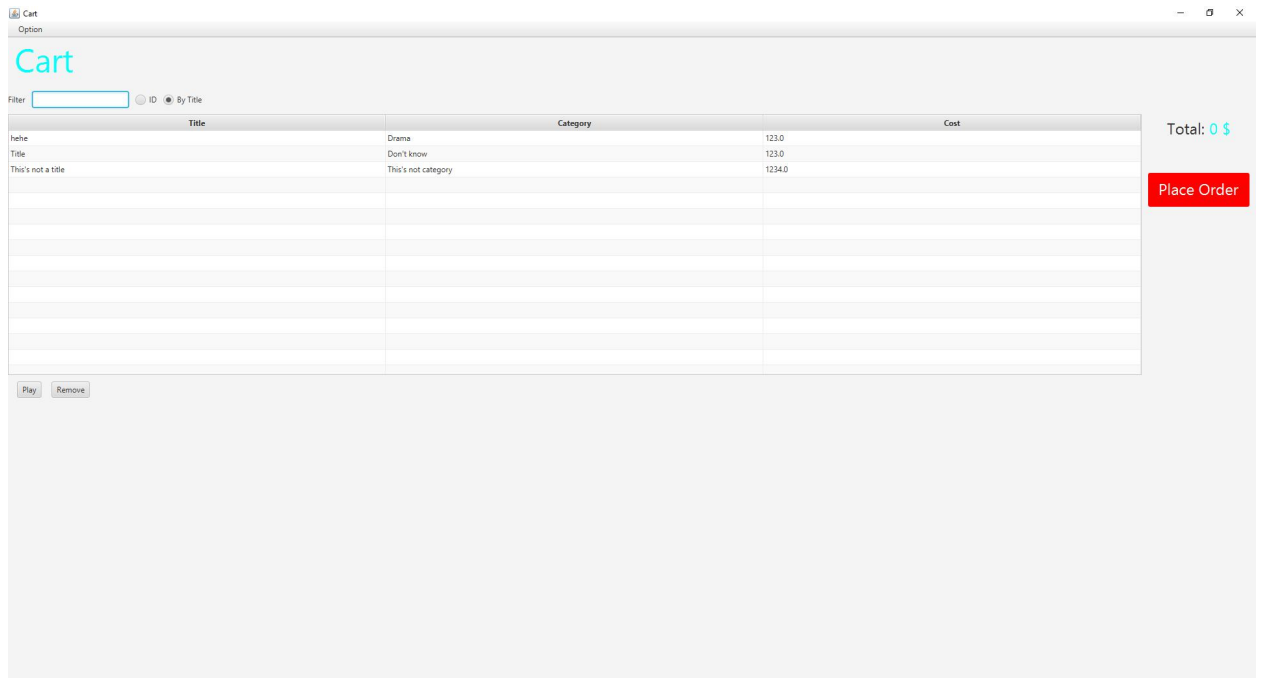

7. View the items in cart – JavaFX’s data-driven UI

- Hình ảnh cho phần Cart screen và add vào cart:

8. Updating buttons based on selected item in TableView – ChangeListener

- Ảnh cho phần update button:

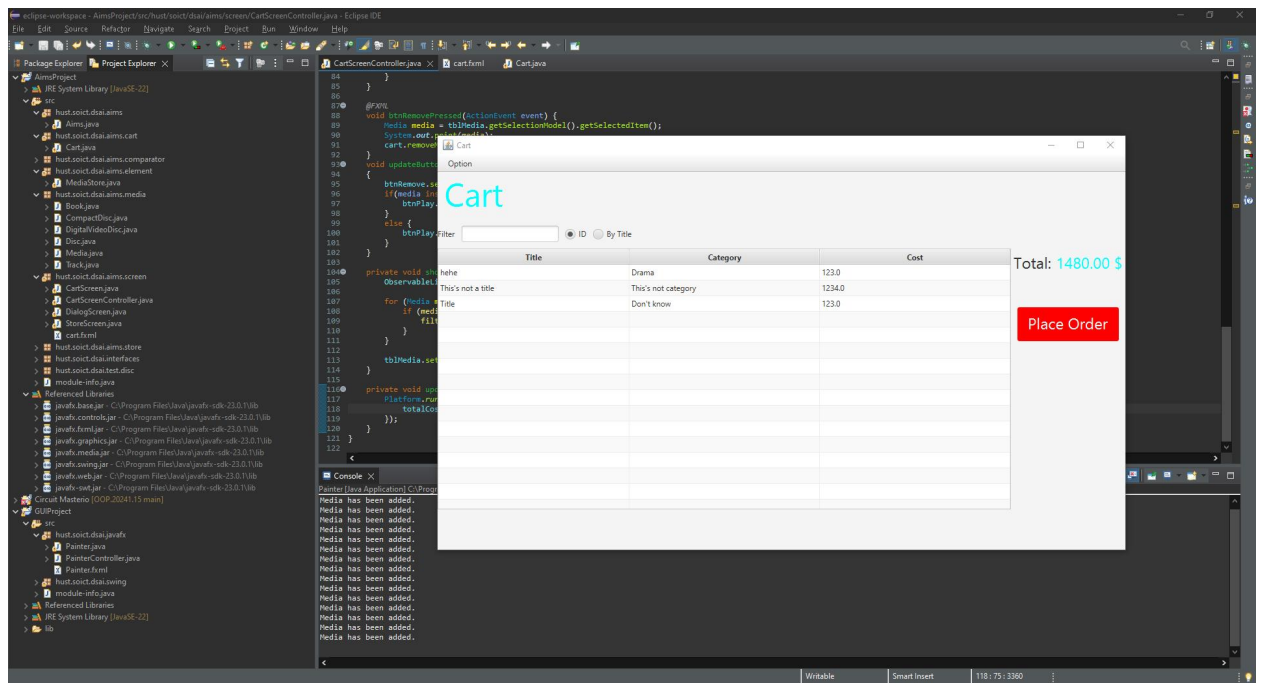

- Sau khi lọc:

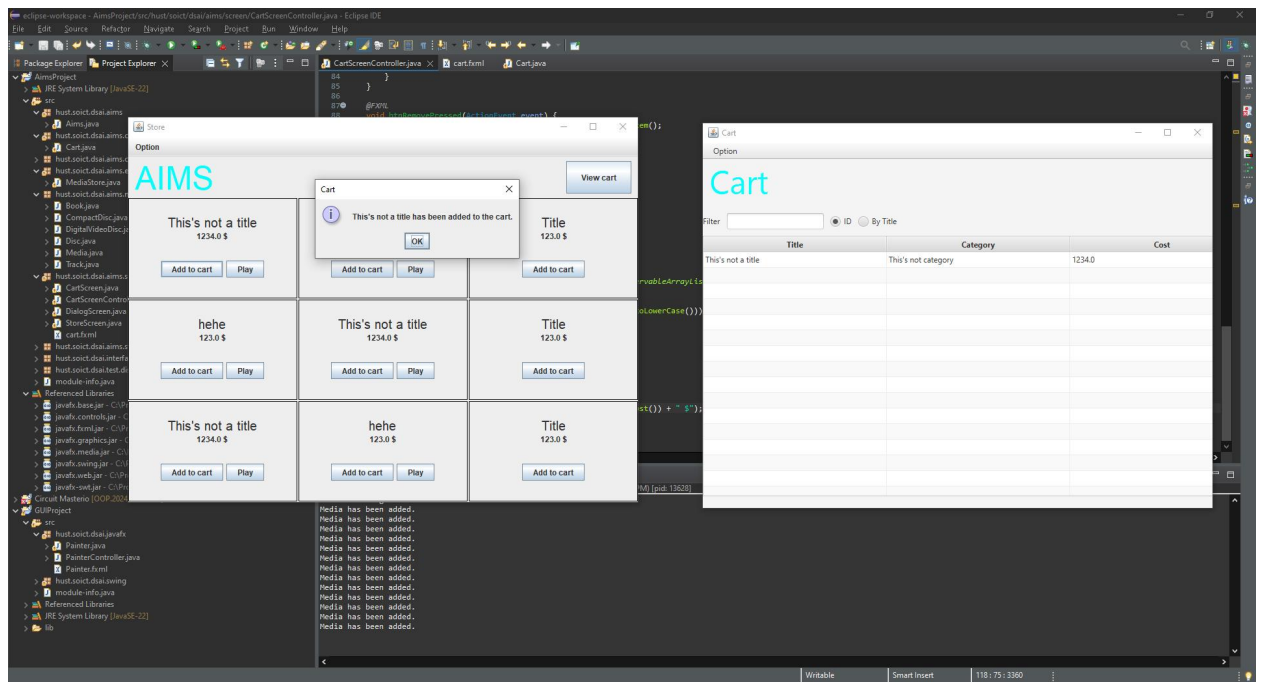

11. Complete the Aims GUI application

- Cải thiện Total:

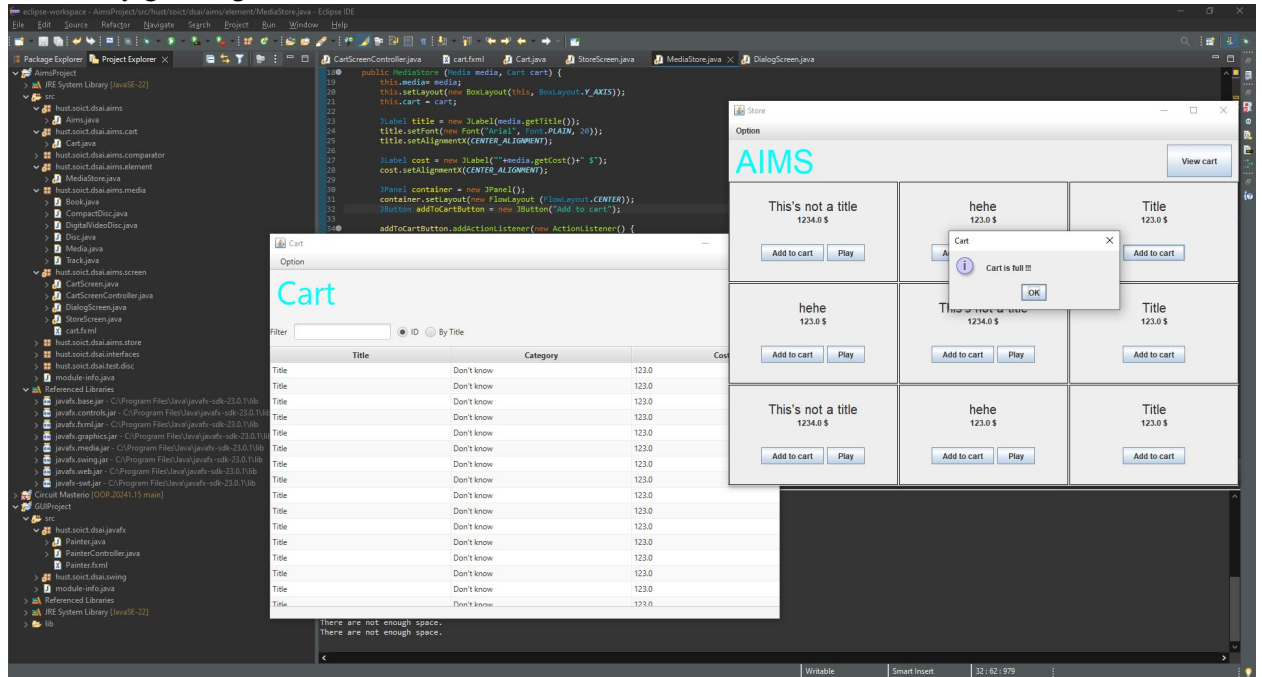

- "Add to cart" Button

12. Check all the previous source codes to catch/handle/delegate runtime exceptions

- Bắt lỗi đầy giỏ hàng:

13. Create a class which inherits from Exception

- Đoạn mã cho lớp Track và DigitalVideoDisc:

```
public void play() throws PlayerException {
    if (this.getLength() > 0) {
        System.out.println("Playing DVD: " + this.getTitle());
        System.out.println("DVD length: " + this.getLength());
    } else {
        throw new PlayerException("ERROR: DVD length is non-positive!");
    }
}
```

```

1 package hust.soict.dsai.aims.media;
2
3 import hust.soict.dsai.aims.exception.PlayerException;
4 import hust.soict.dsai.interfaces.Playable;
5
6 public class Track implements Playable {
7
8     private String title;
9     private int length;
10
11     public void play() throws PlayerException {
12         if (this.getLength() > 0) {
13             System.out.println("Playing DVD: " + this.getTitle());
14             System.out.println("DVD length: " + this.getLength());
15         } else {
16             throw new PlayerException("ERROR: DVD length is non-positive!");
17         }
18     }
19
20     public String getTitle() {
21         return title;
22     }
23     public int getLength() {
24         return length;
25     }

```

- Hình ảnh cho Track exception:

```

1 package hust.soict.dsai.aims.media;
2
3 import java.util.ArrayList;
4 import java.util.Iterator;
5
6 import hust.soict.dsai.aims.exception.PlayerException;
7 import hust.soict.dsai.interfaces.*;
8
9 public class CompactDisc extends Disc implements Playable{
10
11     private String artist;
12     private ArrayList<Track> tracks = new ArrayList<Track>();
13
14     public void play() throws PlayerException {
15         if(this.getLength() > 0) {
16             // TODO Play all tracks in the CD as you have implemented
17             Iterator<Track> iter = tracks.iterator();
18             Track nextTrack;
19             while(iter.hasNext()) {
20                 nextTrack = (Track) iter.next();
21                 try {
22                     nextTrack.play();
23                 } catch (PlayerException e) {
24                     throw e;
25                 }
26             }
27         } else {
28             throw new PlayerException("ERROR: CD length is non-positive!");
29         }
30     }
31
32     public String getArtist() {
33         return artist;
34     }
35     public ArrayList<Track> getTracks() {
36         return tracks;
37     }
38     public int getLength() {
39         return tracks.size();

```

14. Update the Aims class

- Try catch hiển thị alert khi gặp lỗi cho lớp aims, main function:

```

49
50     try {
51         StoreScreen storeScreen = new StoreScreen(myStore, myCart);
52         CartScreen cartScreen = new CartScreen(myCart);
53     } catch (Exception e) {
54         e.printStackTrace();
55         Alert alert = new Alert(AlertType.ERROR);
56         alert.setTitle("Error");
57         alert.setHeaderText("An error occurred while initializing screens");
58         alert.setContentText(e.getMessage());
59         alert.showAndWait();
60     }
61 }
62

```

15. Modify the equals() method of Media class

- Hàm equals mới cho Media class:

```
47  
48 @Override  
49 public boolean equals(Object o) {  
50     Media media = (Media) o;  
51     try {  
52         String title = media.getTitle();  
53         return title.equals(this.getTitle());  
54     } catch (NullPointerException err) {  
55         return false;  
56     }  
57 }  
58
```

16. Reading Document

17. Update Aims Class Diagram
